

LAVAL 20 VIRTUAL 26

08 > 10 April

📍 Laval, France

EXHIBITORS GUIDE

COMING TO LAVAL

Air transport

Benefit from a discount on all Air France and KLM flights (*up to 15% on international routes, only to Paris CDG*).

Event : Laval Virtual Europe

Event Code: **GME51040AF**

Terms: Valid for travel from 28/02/2026 to 17/05/20226

3 steps to claim your unique discount:

1. Follow the regular booking process, when asked if “travelling for business” select **YES** and use your Corporate OIN, if you do not have a Corporate OIN please use **MICE** as “contract name”, this will ensure the Air France-KLM corporate recognition associated with “Global Meetings and Events” program during your flights.
2. After completing your personal details click on **“Proceed to payment details”** at the bottom of the page and enter in the “Your discount code” field the discount code: **GME51040AF**
3. Click on **'Send discount code'** and if conditions are met the discount will be applied.

Thursday 9th April :
7 p.m: Awards ceremony, *Conference Hall*

DESIGN REGULATIONS (1/4)

Booths

Each "packaged" booth is supplied with partitions 2.5m high covered with brushed cotton, carpet, LED lighting, 2kw electric box.

If you have opted for a "bare" location, your booth project must be validated by Laval Virtual **before February 27, 2026**. If the design is not validated, it is likely to be modified or forbidden by the show management during assembly.

If you design your layout with a service provider, please ensure you send your booth design (from all sides, side elevations and visuals if possible) for approval to the following address or by email, and provide us with the contact information of **CONSTRUCTION HEIGHT OF PARTITIONS AND REMOVAL**

- The booth partitions are a maximum of 4m high.
- No decor, furniture, sign or lighting at any point shall exceed the booth limits.

your booth operator so that we can give him access to the site for his installation.

Laval Virtual:

- Maxime LEROY : mleroy@laval-virtual.org

Technical control:

- Nicolas BERNARD (3A Événement) : nicolas@3aevenement.fr

CONSTRUCTION HEIGHT OF PARTITIONS AND REMOVAL

- The booth partitions are a maximum of 4m high.
- No decor, furniture, sign or lighting at any point shall exceed the booth limits.
- Booths with additional levels are not permitted.
- Any requests to use hanging signage must be sent to Laval Virtual **before February 20, 2026**.

LATERAL HEIGHT OF STRUCTURE

- The lateral height of the awning is 4m.
- Validation must be requested from the Show managers for any installation necessitating height above the boothard height of 2.5m.

RIGGING FORBIDDEN

Rigging is not permitted in any structure, whatever the weight of the structure.

PARTITIONS

Any elements on the edge of the aisles must not in any event obscure more than 50% of the length of each façade. Any solid decorative element is regarded as a closure just like glass partitions and windows. It is strictly forbidden to drill, screw, nail or embed in walls, partitions, cladding, pillars and floors, in particular to fix exhibition machinery. It is also forbidden to paint or mark the walls, pillars and floors. (see General Terms and Conditions)

DESIGN REGULATIONS (2/4)

SIGNAGE

Any signage (balloon signs, banners,...) is forbidden throughout the Show, as it is not in keeping with the spirit of the event and its own scenography.

Only installations with elevated signage (signage tower, emblems, etc.) are authorized to a maximum of 5m high, provided they observe a recess of 1m minimum on the aisles and on adjoining booths, and subject to validation by our managers.

ACCESSIBILITY FOR PEOPLE WITH REDUCED MOBILITY

For booths with flooring over 2.5cm, it is necessary to create access for people with reduced mobility (minimum width access 0.9m with a gradient percentage below 5%).

LIGHTING

As a reminder or information, the Exhibition is dark.

Each exhibitor who does not have an equipped booth must provide lighting for his area.

Exhibitors' light installations must remain within the area of the booth and not impose upon other sites or communal areas at the Show (projections, gobos, etc.).

SOUND SYSTEMS/booth DEMONSTRATIONS

Exhibitors intending to carry out demonstrations on their booths must anticipate sufficient space to accommodate spectators. These demonstrations must not under any circumstances disturb other exhibitors or hinder the aisles. The sound level of these demonstrations must therefore be low (maximum 75 decibels) and must not cause any disturbance or complaints from nearby exhibitors. Any broadcasting or commercial animation should not exceed 15 min per hour.

The power supply of the sound systems will be interconnected with the alarm to evacuate the pavilions: contact our managers to order and implement a power control box.

If these conditions are not respected, the Technical Management of the Show will with the means available (notably cutting the electric current) immediately stop any sound on the booth.

DESIGN REGULATIONS (3/4)

SAFETY & FIRE

The layout of your stand must comply with the French decrees of June 25 1980, as amended, and November 18 1987 on the special provisions for type T (trade shows and general public exhibitions), which set out the safety regulations for fire and panic hazards in establishments open to the public.

The fire safety officer is available before and during the event to answer all types of regulatory questions.

At the suggestion of the safety commission or the safety officer, the organizer must prohibit the operation of stands that do not comply with the provisions of the present regulations. In such cases, the distribution of electricity and other fluids will be refused by the organizer.

The organizer declines all responsibility in the event of closure of a stand for failure to comply with the regulations.

INTERNET

The use by exhibitors of their own router or wifi equipment is authorized on the Show only if this use has been the subject of a prior request for frequency on the exhibitors' area (Product catalog > Stand layout > Internet).

We also remind you that the sharing of connections is forbidden on the Show.

ELECTRICITY

Electrical installations on stands are set up from a delivery box which will always remain accessible to stand personnel. These installations comply with standard NFC-15.100, and are operated under the responsibility of the exhibitor. Electrical cables must be designed for a minimum voltage of 500 Volts. Only use cables in which each conductor has its own protective sheath, with all conductors housed in a common protective sheath.

Do not use individual earth connections.

The superimposition of multiple sockets is forbidden.

Please note :

Laval Virtual, committed to CSR and energy saving, will switch off the electricity on the stands each evening at the close of the Show (19:00), and switch it back on each morning before the opening (08:00).

If your stand requires electricity 24 hours a day, please let us know and subscribe to this option in the "shop" section of your exhibitor area.

DESIGN REGULATIONS (4/4)

BOOTH DISMANTLING

Booth may not be dismantled in the presence of the public, and in any case before the event closes to the public.
Dismantling and transporting equipment is the sole responsibility of the exhibitor.

INTERNET

To ensure the smooth organisation and use of the Internet network during the Laval Virtual Show, here are the rules you must follow:

1 - Choice of channel: Wifi operates on two frequency bands:

2.4 GHz frequency - Select Channel 1 only

5 GHz frequency - Select Channel 44 only

2 - Each network must be personalised with a two-part network name:

Stand number

Your stand sign

3 - Transmit power

Set the transmission power to 5dbm in order to limit the transmission power of your Wifi equipment to your space.

Please note

The use by exhibitors of their own router or wifi equipment **is only authorised on the Show if this use has been the subject of a prior request for a frequency on the exhibitors' area** (Fitting out and logistics > Additional services > Internet).

We would also like to remind you that **connection sharing is strictly forbidden at the Show.**

Important information:

we do not guarantee the wifi speed. We therefore strongly recommend that you purchase a dedicated wifi or wired connection for your stand from your exhibitor area.

Our technical managers are on hand to help if you have any problems.

EXHIBITOR ACCOUNT

In order to make the preparation of your arrival easier, Find it on your dedicated exhibitor account:

- All the information needed to the organization of your participation
